

COME DIG WITH US IN 2008

Dinosaur and other fossil digs in the scenic and rugged North Dakota badlands near Buffalo Gap

Sixty million year old fossil sites containing crocodile, champsosaur (crocodile-like animal), turtle, and fish have recently been discovered in the beautiful and rugged badlands near Buffalo Gap, North Dakota. The North Dakota Geological Survey and the Marmarth Research Foundation, in cooperation with the U.S. Forest Service - Dakota Prairie Grasslands, will co-sponsor scientific, professionally-conducted, fossil excavations at this site in August 2008. Public participation is invited.

Crocodile
